- 7.2.1.1.3. The bidder is solely responsible for the accuracy of the product or service's tax classification. No claims for price adjustments will be accepted due to errors in this classification. - 7.5. Submitting the digital proposal implies full knowledge and compliance with the qualification requirements outlined in the Notice and its Annexes. 9.2. The system will identify microenterprises and small businesses in a specific column and compare their values with those of the highest-ranked bidder. If the top-ranked bidder is a larger business, as well as other classified bidders, the provisions of Articles 44 and 45 of Complementary Law No. 123 of 2006, regulated by Decree No. 8.538 of 2015, will be applied.

9.3. In these conditions, proposals from microenterprises and small businesses that are within 5.00% above the lowest price will be considered tied with the highest-ranked bidder.

9.4. The best-ranked microenterprise or small business, as per the previous item, will have the right to submit a final offer to break the tie, which must be lower than the top-ranked bidder's offer, within a period of 05 (five) minutes controlled by the system, starting from the automatic notification.

9.5. If the best-ranked microenterprise or small business either withdraws or does not respond within the specified timeframe, other microenterprises and small businesses within the 5.00% interval will be invited, in order of their classification, to exercise the same right within the timeframe established in the previous subitem.

9.6. In the event of equivalent values presented by microenterprises and small businesses within the specified intervals, a draw will be conducted to determine which entity will first have the opportunity to present a better offer.

10.2. During the public session, communication between the Bidding Agent and the bidders will occur exclusively through message exchanges in the designated field of the electronic system.

10.3.1. Disqualification will always be justified and recorded in the system, with real-time monitoring by all participants.

10.3.2. The failure to disqualify a proposal does not preclude its final judgment in the acceptance phase.

10.4. It is the bidder's responsibility to monitor the operations in the electronic system during the public session, bearing the risk of losing business due to non-compliance with any system messages or disconnection.

10.5. The system will automatically rank the classified proposals, and only these will participate in the bidding phase.

10.10.1. The minimum percentage difference between bids, applicable to both intermediate bids and the bid covering the best offer, should be 0.05% (five hundredths of a percent).

10.10.2. The interval between bids submitted by the same bidder must not be less than 20 (twenty) seconds, and the interval between bids must not be less than 3 (three) seconds.

10.11. Two or more bids of the same value will not be accepted; the bid received and recorded first will prevail.

10.12. During the public session, bidders will be informed in real-time of the value of the lowest recorded bid, but the bidder's identity will not be revealed.

10.13. The bidding mode will be "OPEN," where bidders will submit public and successive bids.

10.14. The bidding phase will last ten minutes. If a bid is placed in the last two minutes of this period, the session will be automatically extended by the system.

- 10.14.1. The automatic extension, as described in the previous item, will last two minutes and will continue successively if bids are received during this extension period, including intermediate bids.
- 10.15. If no new bids are placed as per the previous items, the public session will automatically close.
- 10.16. If the competitive phase ends without automatic extension by the system, the Bidding Agent, with support from the team, may justifiably restart the public session for bids to achieve the best price.
- 10.17. In the event of disconnection with the Bidding Agent during the competitive phase, the electronic system may remain accessible to bidders for bid submission.
- 10.18. If the electronic system is disconnected from the Bidding Agent for more than ten minutes, the public session will be suspended and restarted only after twenty-four hours from the communication of the fact by the Bidding Agent to the participants on the electronic site used for disclosure.
- 10.19. If the bidder does not submit bids, they will compete with the initially registered proposal value.
- 10.20. Tie situations can only occur between identical proposals not followed by bids.
- 10.20.1. After applying the tie-breaking criteria in Articles 44 and 45 of Complementary Law No. 123 of December 14, 2006, if a tie persists, preference will be given, successively, to:
- 10.20.1.1. National bidders;
 - 10.20.1.2. Brazilian companies;
 - 10.20.1.3. Companies investing in research and technology development in Brazil;
 - 10.20.1.4. Companies that comply with legal requirements for reserved positions for persons with disabilities or for rehabilitated individuals from Social Security and that meet accessibility rules.
- 10.21. If the tie persists, the winning proposal will be drawn by the electronic system among the tied proposals or bids.
- 10.22. Negotiation Phase: After the bidding phase, the Bidding Agent will send a counterproposal through the electronic system to the bidder with the lowest global price to obtain a better offer, with negotiation only allowed under the conditions specified in this Notice.
- 10.22.1. Negotiation will be conducted through the system and can be monitored by other bidders.
- 10.22.2. The BIDDING AGENT WILL REQUEST THE HIGHEST-RANKED BIDDER TO, WITHIN 03 (THREE) BUSINESS DAYS, SUBMIT A PROPOSAL ADJUSTED TO THE LAST OFFER AFTER NEGOTIATION, ALONG WITH THE PRODUCT CATALOG/DATASHEET, THE DOCUMENTATION FOR QUALIFICATION, AND, IF APPLICABLE, ADDITIONAL DOCUMENTS NECESSARY TO CONFIRM THOSE REQUIRED IN THIS NOTICE.**
- 10.23. After the price negotiation, the Bidding Agent will begin the proposal acceptance and judgment phase.
- 10.24. The maximum contract price will be made public after the bidding phase, without prejudice to the disclosure of detailed quantities and other necessary information for proposal preparation.
- 10.25. It is the bidder's responsibility to monitor the operations in the electronic system during the public bidding session, bearing the risk of losing business due to failure to observe any system messages or disconnection.
- 10.26. During the public session, bidders will be informed in real-time of the value of the lowest recorded bid. The system will not identify the bidder to other participants.
- 10.27. After the bidding phase, bidders may register their questions for the Bidding Agent through the electronic system at any time.

11. SUBMISSION AND ACCEPTABILITY OF THE WINNING PROPOSAL

- 11.1. Upon completion of the bidding phase and after verifying possible ties and negotiations, the Bidding Agent will examine the proposal ranked first for its compliance with the object and the compatibility of the price in relation to the estimated price for contracting as stated in this Notice and its attachments.
- 11.2. The bidder presenting the **LOWEST PRICE PER LOT** will be considered the winner of the bidding process.
- 11.3. Any offer of advantage not provided for in this Notice and its attachments will not be considered.
